DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 24 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The use of a composition is not patentable.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 3. Claims 5 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 4. The claims contain improper Markush language.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-8, 10 and 16-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Kissel 5,173,531, Dresdner, Jr. 5,375,636, Usuki et al. 5,728,781 or Morris et al. 6,063,849.

Application/Control Number: 10/649,595

Art Unit: 1714

7. Kissel discloses a dried polymer/salt product comprising colloidal salt particulates in claims 1 and 3, metals in claim 13 and zinc acetate in Table A. The coated textile is a formed article. Dresdner, Jr. teaches a glove containing colloidal silver iodide in gelatin in claim 5 and polymers in claim 3. For manufacturing process see Example 1. Usuki et al. recite colloidal salts and oxides in claim 12 and polyalkylene oxides in claim 1. Morris et al. divulge colloidal zinc oxide in claim 1, polymers in claim 3, treating a surface in claim 13 and dipping in column 6, line 28. Applicant's claims are not novel.

Page 3

- 8. Claims 1-11 and 14-24 are rejected under 35 U.S.C. 102(e) as being anticipate by Terry et al. 6,596,401, Gibbins et al. 6,605,751,Kanamori et al. 6,756,124 or Chevalier et al. 2003/0007985.
- 9. Terry et al. reveal silane copolymer in claim 1, polyurethane copolymer in claim 2, colloids of olygodynamic metal salts in claim 5, coated substrate in claim 7, multiple layers in claim 13, dipping, brushing and spraying in claim 20, medical devices in claims17-19, silver nitrate in Example 9, concentrations and one or more salts from column 13, line 45, to column 14, line 10 and colloidal salts in column 14, lines 27-54. Gibbins et al. display a polysaccharide and metal colloid in claims 1, 17 and 21, silver chloride colloid in claims 19 and 25, medical devices in column 4, lines 37-63 and forming, dipping etc. and methods of use from column 8, line 25, to column 9, line 4. See also Example 14. Kanamori et al. present an organosilane and a silicone polymer in claims 1 and 2 and colloidal zinc oxide and/or colloidal cerium oxide in claim 6. For method of applications, see the Examples. Chevalier et al. discuss colloidal zinc oxide

Application/Control Number: 10/649,595 Page 4

Art Unit: 1714

in claim 5, gums and elastomers in claim 8, other polymers in claims 20, 21 and 27. Applicant's claims are not novel.

Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kissel 5,173,531, Dresdner, Jr. 5,375,636, Usuki et al. 5,728,781, Morris et al. 6,063,849, Terry et al. 6,596,401, Gibbins et al. 6,605,751,Kanamori et al. 6,756,124 or Chevalier et al. 2003/0007985.
- 12. All references have been described already. The examiner holds that partially coating an article or coating a transparent article is a matter of choice, and as such, it would have been obvious to one having ordinary skill in the art, at the time the invention was made.

Double Patenting

13. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

Art Unit: 1714

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

14. Claims 1-8 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 41, 43-52 and 56-58 of copending Application No. 10/212,505. Although the conflicting claims are not identical, they are not patentably distinct from each other because the compositions overlap.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (571) 272-

1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
